DepoView for iPad

An easier way to review and manage your depositions on the go.

Features:

- › Manage multiple case folders
- › Create new case folders right on the device
- › View video transcript testimony and create clips
- › Use keywords to search through transcripts and jump directly to specific video segments
- › Extract key testimony from your transcript
- › Create single and multi-segment clips
- › Email Clip Creation Script files (.ccs)
- › Import files from iTunes[®]
- › Accepts .DVT and .DVI files from TimeCoder[™] Pro
